WE ARE MANUFACTURER & EXPORTER  
OF FINE QUALITY MODELING MATERIALS

From basic shapes  
TO UNLIMITED CREATIVITY

2016

WE ARE MANUFACTURER & EXPORTER  
OF FINE QUALITY MODELING MATERIALS

"OUR GREATEST NATURAL RESOURCE  
IS THE MINDS OF OUR CHILDREN"

WALTER ELIAS DISNEY

## NARA QUALITY POLICY

PROVIDE HIGH QUALITY PRODUCTS  
ON TIME DELIVERY  
CONTINUOUS IMPROVEMENT  
IN ALL RELATED PROCESS

- Established in year of 1975 under the name of "SIRIMANIT"
- Plays a major role in the field of modeling clay manufacturer in Thailand
- Started the business by selling domestically for more than 40 years
- In the year 2003, started export activities under the name of "NARA FACTORY CO., LTD."
- All products have conformed to International Standard
  - EN 71 (Part 1,2,3,9,10 and 11)
  - ASTM D-4236
- ISO 9001:2008 certified by Bureau Veritas

Air Hardening clay

## PRODUCTS

It is an oil based material. It will not dry out, harden or shrink even leaving in the air for a long time. It can be used again and again.

There is no fungus occurred in our modeling clay, therefore, no preservative is added in our modeling clay. It is totally safe for children.

We do not recommend for eating. However, if children accidentally ate, their body can digest without any harm.

Its shelf life is more than 3 years.

- MADE by corn**  
100% of material is pure from nature with special selection
- NON GLUTEN**  
SAFE for kids  
CLEAN, SOFT&SMOOTH
- Super soft and non-stick on hands**

Its shelf life is more than 3 years.

- Foam based material**  
Soft texture and easy to mold
- Air Hardening**  
Smart Choice for Kids to enhance their imagination and creativity
- NO GLUE is needed**

Its shelf life is about 1 year

It is safe modeling material. It will become harden when leave in the air for one or two days. Kids can create their own things and keep them dry for permanent purpose.

The good characteristic is light weight and soft touch. No oven or kiln is needed.

It can become dry out if not keeping into an airtight container.

Its shelf life is about 1.5 years.

It is the water-based modeling material. Its good characteristic is a very soft touch. The main component of dough is flour and water. Dough can become hard if we leave it in the air for one or two days.

Water can be dropped in a little to make it able to knead again before it totally dries out. Dough has to be kept in an airtight container after used.

**Our dough is Gluten Free** which is safe for kids who are allergy to Gluten.  
(Gluten is a protein from wheat, barley and rye)

Its shelf life is about 1.5 years.

Floating clay is an oil-based modeling material whose density is less than water so the finished design can float in the water. The best choice for bath-tub playing.

Its shelf life is about 3 years.

## PAPER MACHE

It is made by virgin pulp paper (basic material) with some other non-toxic ingredients.

It is an ideal model making material in dry form, which can be used by adding few amount of water, mixing and making some layers for subject. Let it completely dry before making some more layers to finish the object.

The advantage of using paper mache is to get nice texture look, more strong and artistic appearance. Acrylic or poster paint can be done to give a nice complete look.

Its shelf life is more than 2 years.

## Air Hardening clay

It is one of the best sculpture paste material with the mixture of Paper Fiber. Once it completely dries out, it gives a stronger result.

In case the clay is going to be dried out, just add a few drop of water to make it softer and continue your work.

Finished figure can be sanded, painted or vanished to get a perfect look.

Acrylic or poster color can be applied to a completely dried out figure.

Its shelf life is about 1.5 years.

It is a "make and bake" clay. It hardens after putting into an oven about 15-30 minutes (depends on the size of a sculpture) at the temperature of 130 °C.

After baked, it becomes permanent sculpture. Polymer clay could be painted with ink, Acrylic paint, Chalk or metallic powder.

Its shelf life is about 2 years.

## Pottera Natural Clay

It is a heavy weight kind of air dry clay. It comes from real earth clay. The finished products can be left dried and harden themselves. This kind of clay needs to be kept in an airtight storage to prevent it from dry out.

We can get a porcelain masterpiece out of Pottera Natural clay by putting it in the kiln at 1,000-1,200 °C.

Once it becomes hard before project finished, we can add a little amount of water to moisture the dry part and resume to work.

Its shelf life is about 1.5 years.

## Professional Clay

Professional modeling hard material

A smart choice for professional sculpture makers. Clay density is highly recommended to make sculpture with small details.

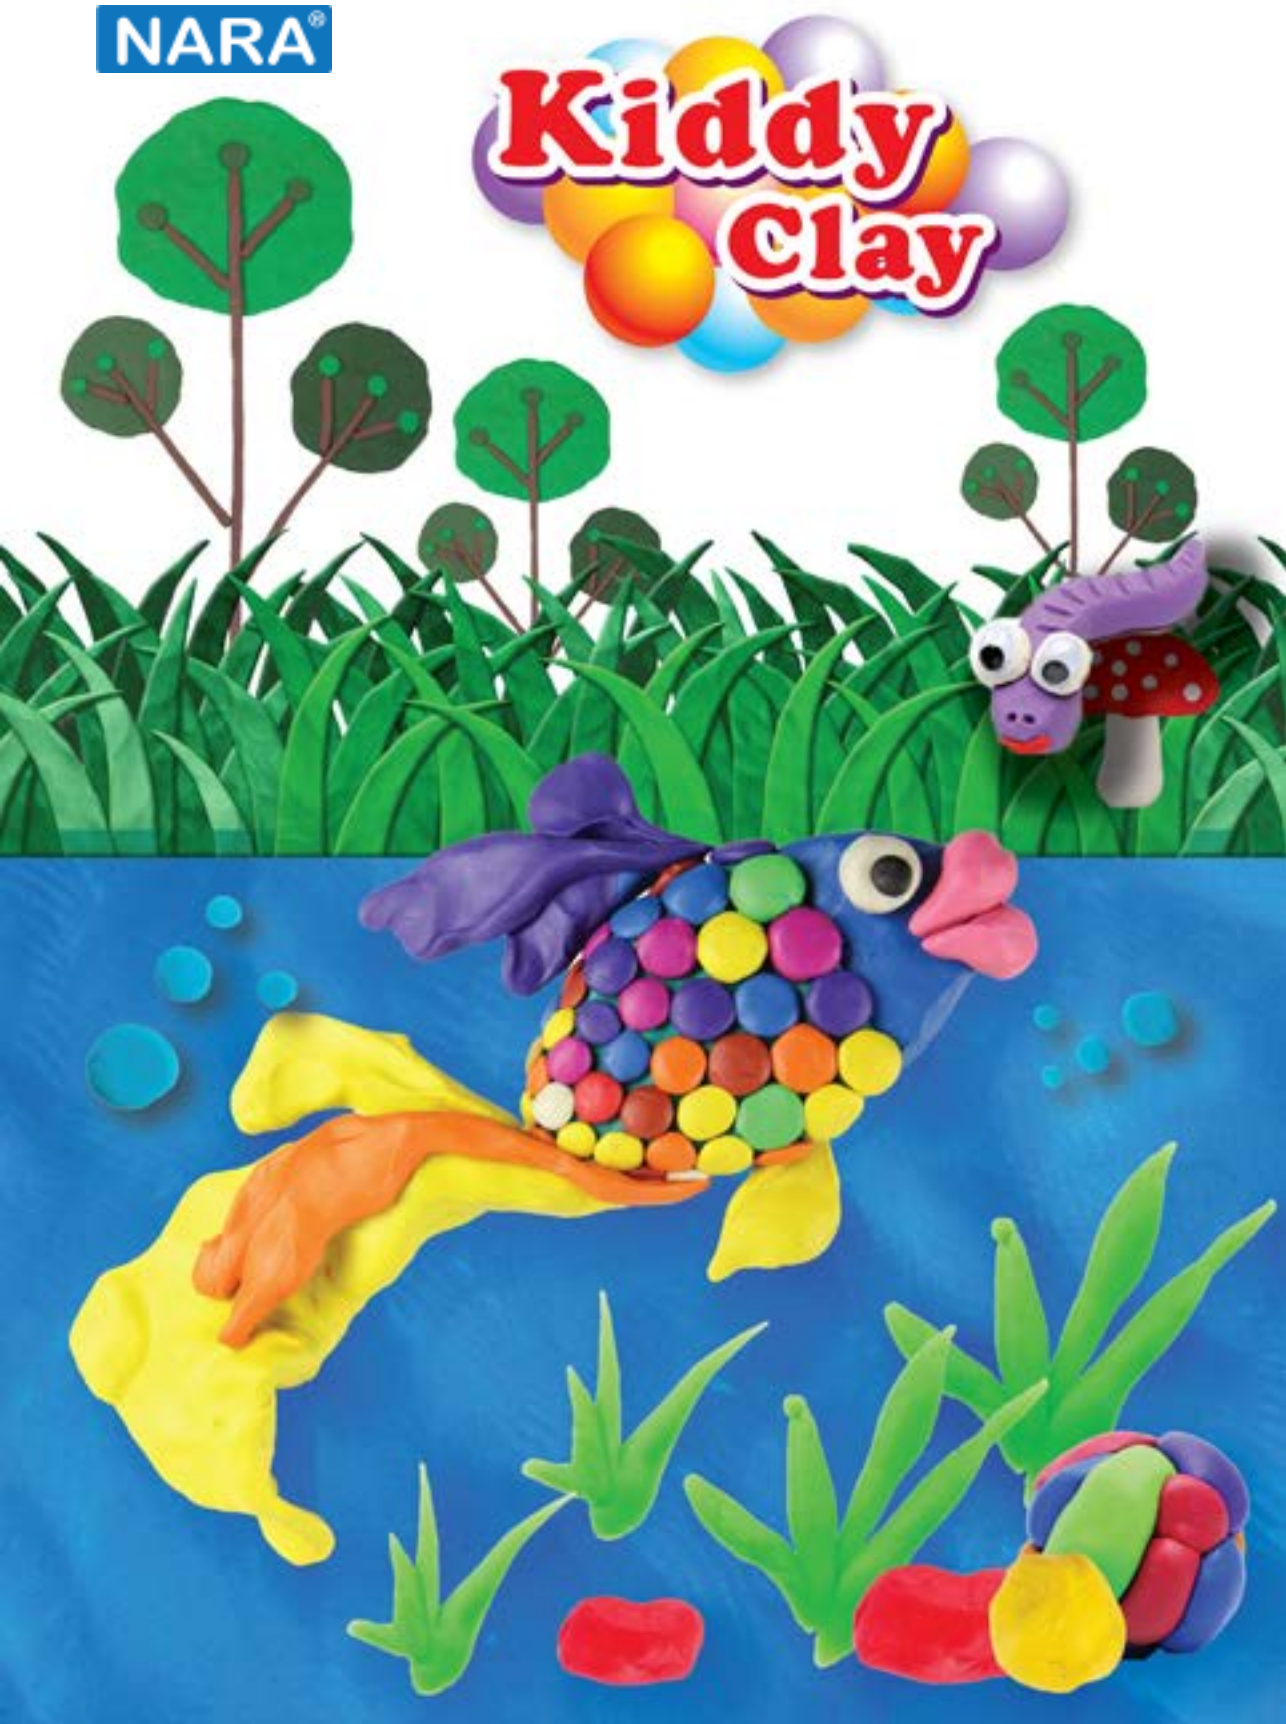

Its shelf life is more than 3 years.

## Accessories

Our complete range of accessories develop wisdom in the kids to utilize their ultimate ability while playing with our modeling materials.

1 Choose your favorite animal or tree shape and gather all of the pieces together. Use an assortment of modeling clay colors to fill each cavity.

2 Use the tool included, create texture and design on your clay creation.

3 Shape a large ball of clay to make the body of the animal or the base of the tree and insert all of the clay-filled pieces into it. Use more colours of clay to make spots, stripes and other features. Admire your 3D creation, then choose a new shape and begin again.

that is good for Model makers and Artists

## PROTO-6B

Single color, 6 bars of Proto Clay  
(50 g. each, total 300 g.) in paper box  
size : 7 x 6.5 x 9 cm.

| PACKING<br>PCS/CTN | G.W./CTN<br>(KG) | MEASUREMENT<br>(CM) | CTN/<br>Tkg |
|--------------------|------------------|---------------------|-------------|
| 48                 | 17.00            | 0.028               | 1,000       |

### Basic Instruction :

1. Create your own design.
2. Wash hands with soap and water before and after using **Proto Clay**.
3. Choosing the desired color and knead it in your hands until it warm and easy to work with.
4. Shape the clay into your chosen design.
5. Put the finished shape into an oven and bake at 265°F(130°C) for 15 to 30 minutes. The baking period may vary depending on the size of the model. Do not put any other accessories into the oven.
6. Leave your creation cool down and use sandpaper to remove any rough area. Painting with acrylic colors can be done (if needed).
7. After painting, Nara varnish can be applied to the object to get a shiny and glossy surface.

# **PROTO-D(48)**

# SCOOBY HAT

NEW

stuffs inside :

- 80 g. of paper mache
- 5 balloons
- 1 playmat
- 1 paintbrush
- 3 colors powder Ribbon
- Ribbon

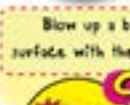

size : 13.5 x Ø16.5 cm

| PACKING<br>POS./CTN | G.W./CTN<br>(KG) | MEASUREMENT<br>(CBM) | CTN/<br>1x20' |
|---------------------|------------------|----------------------|---------------|
| 12                  | 4.00             | 0.072                | 390           |

## STEP BY STEP

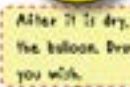

Cover your working area with cool Playmat.  
Use 3 parts of Paper Mache to 1 part of water, then mix them thoroughly.

Blow up a balloon and cover half of the surface with the already mixed Paper Mache.

Leave it to dry completely. It may take 1-2 days. For a stronger hat add a second layer.

After it is dry, remove your hat from the balloon. Draw a face and coloring as you wish.

Punch a hole on both sides of the hat. Tie up with an ribbon.
